

Alex YANG

I build developer growth systems for AI products - partnerships, technical content, community programs, and agent-powered workflows that turn infrastructure into adoption.

SELECTED IMPACT

PARTNERSHIP REACH 500K Hermes Agent x NovitaAI impressions	OPEN-SOURCE 100+ merged outreach PRs	COMMUNITY 3K → 5K Discord members	EVENTS 200+ live viewers per session	BD RESOURCES ~\$300K sourced via community marketing
---	---	--	---	---

EXPERIENCE

Developer Relations · NovitaAI

Jan 2026 - Present

- Led the Hermes Agent partnership from outreach to built-in provider launch and co-marketing, generating about 500K X impressions.
- Built DevRel automation supporting 100+ merged PRs and 10+ leads; grew Discord from 3K to 5K and sourced ~\$300K in BD resources through community marketing.

Core Developer & Developer Relations · Apus Network

Feb 2025 - Dec 2025

- Built AI inference services with WASI-NN, llama.cpp, vLLM, and sglang; deployed confidential workloads on NVIDIA GPU TEE.
- Maintained Lua on-chain protocol logic and supported technical talks, X Spaces, and live-coding workshops.

Software Engineer · Samsung Electronics

Jul 2023 - Feb 2025

- Developed C#/.NET TV applications, improving runtime performance, CPU use, and memory efficiency.
- Collaborated with Baidu on an AI chat application using cloud deployment and RAG.

SELECTED PROJECTS

Hermes Agent x NovitaAI Partnership / 500K reach Provider integration, partner positioning, launch coordination, and co-marketing.	DevRel Automation Pipeline 100+ PRs / 10+ leads Agent workflows for open-source discovery, outreach, follow-up, and SEO.
AI Inference Service Secure inference OpenAI-compatible sglang service with deterministic inference, GPU TEE, and on-chain metering.	awesome-hermes-tutorial Open-source education Practical tutorials for provider setup, messaging integration, and reusable agent templates.

CORE SKILLS

Python / Rust / C++ / vLLM / sglang / WASI-NN / GPU TEE
/ Technical Writing / DevRel Automation

EDUCATION & LANGUAGES

Hanyang University - Software Engineering, 2019-2023; full scholarship, GPA 3.4
Chinese (native) / English (IELTS 6.5) / Korean (TOPIK 5)
